

TO AL

Started in 2005 as MLS Garden Freshest, then came Caress By Nature (Australia) in 2012 until a partnership now called The Organic Artisan Lab. We educate and train skin care enthusiasts, using 100% natural and plant derived ingredients, we make use of Australian Certified Organics from our Certified Organic Ingredient Suppliers, to create a uniquely formulated, high performance skincare, cosmetics, cosmeceuticals and nutraceuticals. Our expertise in organic skin care formulation assures our loyal customers of products that are made to nourish and protect the body, passionately caring for the environment.

An organic cosmeceuticals, nutraceuticals, high performance skin care that is tested safe, hypoallergenic, cruelty-free, no nasty chemicals, effective and environment friendly. We offer natural, pure and made with 100% certified organic products for anti-ageing, skin pigmentations and anti-acne for that fresh glowing complexion.

All the ingredients in our organic skincare and cosmetics have been meticulously researched and selected. Our chemical-free, natural beauty products are created in-house so we control all processes. All our products are vegan, cruelty and gluten free, and are lovingly handcrafted in small batches and come to fruition with loving intention and the utmost care.

Most of our ingredients begin their life in the soil, not in a laboratory, and the lab synthesized (if a skin care requires) ingredients we do use are amongst the world's safest and received eccocert approval. This means the majority of our ingredients are natural and organic (not merely a token amount, as is commonplace). Our formulations harness the very best of what nature has to offer, and when combined with our unique and small batch of respectful manufacture process, preserve the potency and life force of the precious essential oils and organic plant oils we use. Above all, our commitment to results means that we will never compromise on quality, no matter what the cost.
