### **ABOUT OUR CMS SERVICE**

- Appzmate provides a hosted content management system (CMS).
- It is easy to use, centrally supported with different functions and features that help users to manage their app contents on the go.
- At its simplest, CMS is an acronym for a "Content Management System".

### **GETTING AN ACCOUNT**

- As part of promotional period for this new exciting app offering, we provide a community app to all interested companies and organizations which will allow you to share your information to public and maintain your mobile app presence.
- Other features will be explained when one of our customer support contacts you. If you are interested to have your own App in Appstore please inform us by filling up the form from the link below.
- It will only take within 24 hours to make your app in our community version to become available, after we verified and confirm your details submitted we will send you your account details as soon as your app is ready.

To get an account with appzmate simple Visit

http://www.sysdatahub.com/customer-registration-for-new-app/

Or visit

www.appzmate.com

And fill up the Customer Registration Form.

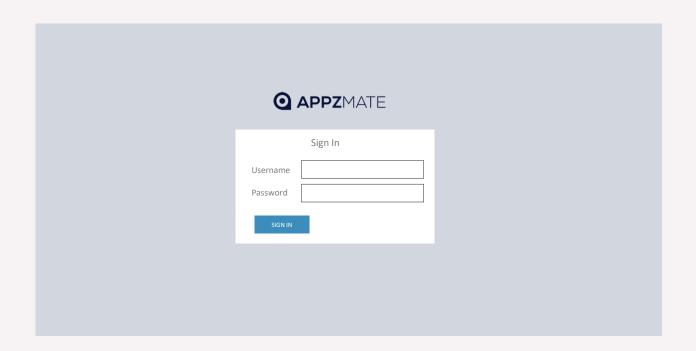

cms.emobishare.com:842

CMS LINK: <a href="http://cms.emobishare.com:842">http://cms.emobishare.com:842</a>

Use the link above in order to access the appzmate cms

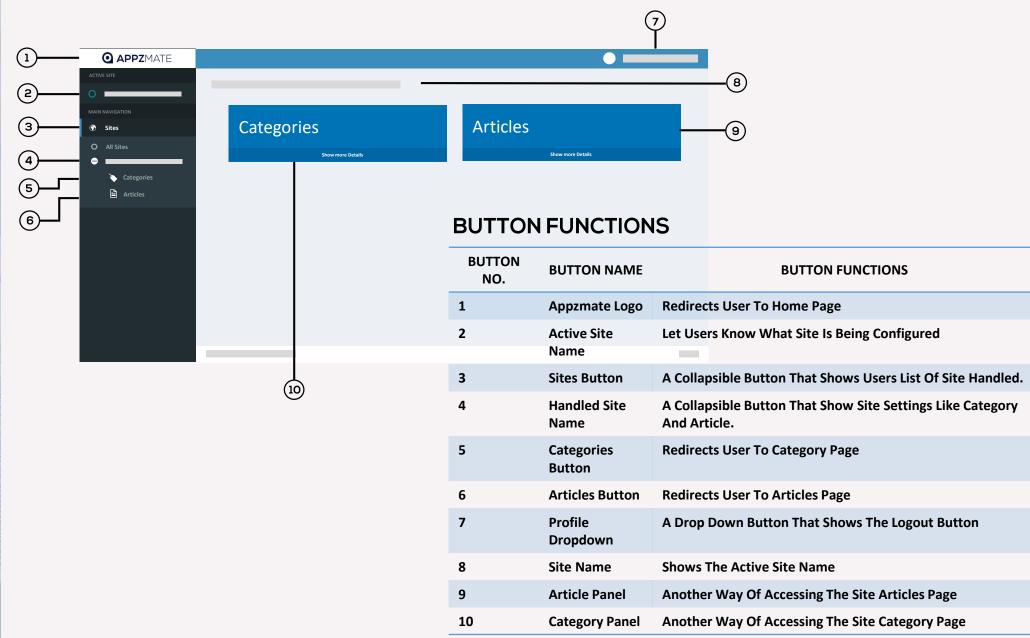

- Appzmate CMS requires User credentials. Only those who has Valid Username and Password can access the CMS.
- After successful Login user will be redirected to CMS Homepage where user can see his/her handled site/s and allow user to configure app contents like categories and articles.
